Tampere - Finland

Summary

Front-End Developer with experience building scalable, high-performance web applications using React and JavaScript. Strong focus on UI/UX, component-based architecture, cross-browser compatibility, and performance optimization to deliver reliable user interfaces. Experienced in integrating REST APIs, using Git for version control, and collaborating with cross-functional teams to translate product requirements into maintainable front-end solutions aligned with business goals.

Skills

HTML5, CSS3, JavaScript (ES6+), React.js, JSX, Hooks, Redux, component-based architecture, responsive web design, mobile-first design, UI/UX principles, cross-browser compatibility, web performance optimization, RESTful APIs, API integration, Git, GitHub, version control, npm, Tailwind CSS, Bootstrap, Sass, semantic HTML, state management, debugging, browser developer tools, Agile/Scrum collaboration, Figma, design-to-code implementation, testing fundamentals, and clean, maintainable code, communication skills.

Work Experience

Radin Taviira - Tehran, Iran

Jan 2024 - Apr 2025

Front-End Developer

- Built and maintained responsive, mobile-first user interfaces using HTML, CSS, and JavaScript
- Developed clean, user-focused UI layouts using modern CSS techniques, ensuring cross-browser compatibility
- Debugged and resolved frontend issues, improving application stability and reliability
- Optimized frontend performance by minimizing unnecessary DOM updates and event listeners

Ali Mohebi Modelling - Tehrab, Iran

Feb 2023 - Oct 2023

Front-End Developer

- Contributed to increased online visibility, supporting the client in securing two professional modeling contracts
- Designed and developed a client-facing web application using HTML, CSS, JavaScript and React
- Implemented component-based UI structures to improve code maintainability and scalability
- Maintained and updated the application over time, fixing bugs and improving performance
- Optimized frontend performance by minimizing unnecessary DOM updates and event listeners

Projects

Modern React Dashboard Application

- Built a responsive, component-based dashboard using React (Hooks) and JavaScript (ES6+) with a focus on clean architecture and reusability.
- Implemented REST API integration to fetch, display, and manage dynamic data, including loading and error states.
- Designed a mobile-first UI using CSS/Tailwind, ensuring cross-browser compatibility and accessibility best practices.
- Translated UI designs into functional components, emphasizing maintainability and scalability.

E-Commerce Product Listing & Cart System

- Developed a fully responsive e-commerce interface with product listings, filtering, and a shopping cart using React and JavaScript.
- Integrated RESTful APIs to retrieve product data and dynamically update the UI.
- Ensured consistent behavior across modern browsers and devices.

Education

Tampere University of Applied Science

Bachelor of Engineering in Software Engineering

Expected graduate date: 2028

GPA: 5.0 / 5.0 (current)
